REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to anticipate or make obvious the structure of a horizontal band saw with a bevel cutting adjustment device with the following details to the inclination adjustment assembly. It should be noted that after a thorough search of prior art several of the cited prior art references were found to disclose horizontal band saws with beveling functions/structures; however, none of these references, taken alone or in combination, taught or suggested the specific combination of structural elements for the beveling mechanism. The specific structural elements and relationships that are lacking are as follows: a rear pivot assembly mounted on the rear of the frame and pivotally connected to the bottom of the housing, a front adjustment assembly mounted on the front of the frame and connected to the bottom of the housing and comprising an inclination adjusting assembly having a top stationary bracket with a pivot pin, a bottom stationary bracket aligned with the top bracket, a pivot seat pivotally mounted on the bottom stationary bracket and having a top, an adjusting gear rotatably mounted in the top of the pivot seat and having an axial threaded hole, a driving assembly mounted on the pivot seat to turn the gear, and a leader threaded rod screwed into the axial threaded hole of the gear and having a top end pivotally connected to the pivot pin of the top bracket and a bottom end extending out of the pivot seat.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
